ICOM 4029 – Compiler Construction

Prontuario - Fall 2007

IMPORTANT NOTE

Read this prontuario as soon as you get it and read it carefully! It contains the “rules of the game”. Avoid unexpected surprises when it is too late to do anything about them. Ignorance of the rules is no excuse for breaking them.

1. Faculty & Staff

Dr. Bienvenido Vélez Rivera

Office: S-701

E-mail: icom4029-profs@ece.uprm.edu

WWW: <http://www.ece.uprm.edu/~bvelez>

Office Hours: TBA

Abdiel Avilés

Office: Advanced Data Management Lab (R&D Center)

E-mail: icom4029-tas@ece.uprm.edu

Office Hours: TBA

2. Course Description

Techniques involved in the analysis of source languages and the generation of efficient object codes with emphasis on the components of a compiler.

You will find a detailed course outline in an accompanying handout.

3. Pre-requisites

ICOM 4035 – Data Structures

4. Lectures

Mondays/Wednesdays 9:30 AM – 10:20 AM, S-203

5. Course Credits

3 credits

6. Course Web Site

The course will have a website holding many useful resources to help your throughout the course. We try to make an effort to keep the site updated, but will invariably make mistakes and forget to update materials once in a while. PLEASE LET US KNOW ABOUT ANY PROBLEMS WITH THE WEBSITE AS SOON AS YOU DETECT THEM. We tend to get a fair amount of general criticism for not keeping the site up to date, but we seldom get an email notifying a broken of stale link. HELP US HELP YOU.

7. Textbook & References

Compilers: Principles, Techniques, and Tools

by Alfred V. Aho, Ravi Sethi, Jeffrey D. Ullman (Contributor)

Hardcover: 500 pages ; Dimensions (in inches): 1.42 x 9.50 x 6.62

Publisher: Addison-Wesley Pub Co; (January 1986)

ISBN: 0201100886

The following is a list of reference books in which some of the material discussed in class can be found:

	<p>Concepts of Programming Languages (6th Edition) by Robert W. Sebesta Hardcover: 704 pages Publisher: Pearson Addison Wesley; 6th edition (July 24, 2003) ISBN: 0321193628</p>
	<p>Modern Compiler Implementation in Java by Andrew W. Appel, Jens Palsberg Hardcover: 512 pages ; Dimensions (in inches): 1.14 x 8.72 x 8.46 Publisher: Cambridge University Press; 2nd edition (November 2002) ISBN: 052182060X</p>
	<p>Unix in a Nutshell : System V v 2.0 by Daniel Gilly, Mike Loukides Paperback: 444 pages ; Dimensions (in inches): 1.25 x 9.00 x 6.00 Publisher: O'Reilly & Associates; 2nd edition (1995) ASIN: 1565920015</p>

An additional set of programming language references, manuals supplementary materials will be posted on the course website.

8. Email

Every student is required to have an email account accessible from the Internet. Email will be an essential means of communication between students and staff during the term. **Students and staff will be assumed to have received email within 24 working hours, not including weekends.** Students are responsible for properly maintaining their email accounts so as to avoid email from bouncing. Both students and staff may make use of the following email lists:

List Name	Usage
icom4029-profs	Professors
icom4029-tas	Teaching Assistant
icom4029-students	Students
icom4029-forum	Students plus professor

The mailman system automatically keeps archives of all the lists which can be accessed at:

<http://www.ece.uprm.edu/mailman/listinfo/<list-name>>

You may not use the class mailing lists for personal matters not related to this course. Inadequate use of email may violate institutional policy on Internet and information technology use and may trigger disciplinary action. Please observe the rules of netiquette at all times.

9. Office Hours

The professor will hold weekly office hours. This is an excellent opportunity to go over the material discussed in class on a one on one basis. Unfortunately, many students who may greatly benefit from it seldom visit the professor or the TA before their doubts have accumulated to the point where it becomes very hard to keep up with the course. We commonly get student complains near the end of the semester about the difficulty of some concepts and their inability to keep up with the course. Such complaints seldom come from students who have frequently attended office hours. If you do not understand a concept discussed in class please use this important resource. Bring your questions and remember that the dumbest question is the one that is never asked. IT IS OUR JOB AND GOAL TO HELP YOU MASTER THE COURSE SUBJECTS.

10. Course Evaluation

Your grade will be based **exclusively** on the scores that you obtain in the class programming assignments, partial exams and a final exam. The weights assigned to each of these categories are as follows:

Evaluation Categories	Percentage Weight
Programming Assignments (5)	50%
Partial Exams (2)	20% (10% each)
Final Exam	30%

Your total score will be calculated as a weighted average of your average scores in each category. Each individual programming assignment and exam will carry the same weight within its corresponding category. Your grade will be determined by a standard curve as follows:

Grade	Points Interval
A	[90, 100]
B	[80, 90)
C	[70, 80)
D or F	[0, 70)

VERY IMPORTANT!
In order to pass the course you must turn in all your programming assignments and attend all exams.

Students are expected to provide the best possible solution to programming assignment and exam problems in order to get full credit. We will not only evaluate **correctness**; we will evaluate **quality** as well.

11. Programming Assignments

This core of the course will be the compiler project, which will be divided in various programming assignment phases. Each programming assignment will carry a relative weight corresponding to the level of effort and difficulty involved. Although we encourage student collaboration **it is a requirement of this course that students work on each programming assignment in groups of two students**

You may turn in a programming assignment late, but you must always submit your programming assignments to pass the class even if it accumulates no points towards your total score. A percentage of the score will be deducted for your score for late submissions as follows:

Days Late	Percent Deduction
1 day late	25%
2 days late	50%
3 days late	100%

As for exams, programming assignments will be graded for both correctness and quality according to the following weights:

Criteria	Weight (%)
Correctness	60%
Design	20%
Efficiency	10%
Style & Documentation	10%

A programming assignment will be considered correct if it can pass a minimal test set that will be provided with the assignment. Students will have **ten (10) working days** after their graded

work is returned to them to make any claims about incorrect grading of programming assignments or exams. No further claims will be considered after this time.

All programming assignments will be submitted electronically. You will receive instructions for electronic submission of programming assignments with each programming assignment. In some programming assignment the staff may decide to conduct in person interviews in order to gain better understanding of work accomplished by students and provide faster feedback that could be incorporated in future assignments in the course.

12. Partial Exams

We will have three partial exams. Each exam will cover material up to and including the material covered before the date of the exam. However, emphasis will be placed on the material discussed but not tested by previous exams.

The exams will be administered out of class at dates and times to be announced during the first few weeks of the term, but never later than two weeks before the exam; this to allow for sufficient time for students to plan their studying. Once the dates of the exams are announced, they will not be subject to change. You are responsible for planning ahead of time. Having other exams the same day is no excuse for changing the dates.

Attending partial exams is a requirement of this course and missing an exam will be reason enough to fail the course, unless an arrangement can be worked out with the professor at least 24 working hours before the date of the exam.

Students must work individually on all exams. More on this below under academic integrity.

13. Final Exam

A comprehensive final exam will be administered at the time and date determined by the UPRM Registrar.

14. Academic Integrity

El artículo 10 del Reglamento General de Estudiantes de la Universidad de Puerto Rico contiene 15 puntos que se consideran "infracciones de las normas esenciales al orden y a la convivencia universitaria y acarrear sanciones disciplinarias." He aquí uno de los puntos.

La obtención de notas o grados académicos valiéndose de falsas y fraudulentas simulaciones, o haciéndose pasar por otra persona, o mediante treta o engaño, o copiando total o parcialmente la labor académica de otro estudiante, o copiando total o parcialmente las respuestas de otro estudiante a las preguntas de un examen, o haciendo o consiguiendo que otro tome en su nombre cualquier prueba o examen oral o escrito.

Violaciones a estos puntos pueden conllevar algunas de las siguientes sanciones:

1. *Amonestación*
2. *Probatoria por un tiempo definido durante el cual otra violación de cualquier norma tendrá consecuencia de suspensión o separación*
3. *Suspensión de la Universidad por un tiempo definido. La violación de los términos de la suspensión conllevará un aumento del período de suspensión o la separación definitiva de la Universidad.*
4. *Separación definitiva de la Universidad.*

Obtener información del Internet no autorizada por el profesor será considerado una violación flagrante del estatuto anterior. El estudiante que viole este reglamento obtendrá F en la clase y su caso podrá ser llevado ante la junta de disciplina del Recinto. Evítese este mal rato, o aténgase a las consecuencias.

Esperamos no tener que lidiar con una situación como esta, pero estamos preparados para responder enérgicamente de ser necesario.

Éxito.

ICOM 4029 Staff
