Statement of Work: University of Puerto Rico Mayagüez

This proposal calls for Dr. Velez-Rivera at the University of Puerto Rico-Mayaguez to explore how flexible and personalizable interfaces can be used in educational settings. In particular, Dr. Velez-Rivera will focus on the use of meta-data to improve information access in NSDL context. In particular Dr. Velez-Rivera will contribute to the context-sensitive service composition aspects of the proposal. Along with his graduate students, Dr. Velez-Rivera will work with Virginia Tech PI’s to implement a working context server to support flexible and personalizable interfaces.

Dr. Velez-Rivera will contribute significantly to the recruitment of Hispanic graduate students to Virginia Tech and Villanova in the area of Computer Science.
