Presents and analizes relevant and current literature related to all			
aspects of the project			
Presents the organization of the rest of the report			

Final Report Evaluation					
Design Criteria and Specifications	#DIV/0!	15%			
Describes all the system specifications					
Describes the Design Criteria					
Describes the design/implementation/testing tools and how they					
were used					
Analyzes the constraints and limitations of the system					
Analyzes the constraints and limitations during the design and					
implementation of the system and how they affected system specs					
Analyzes the minimum/recommended requirements of HW and					
SW for the system to run properly					
Methods and approach to the solution	#DIV/0!	15%			
Presents an account of the activities in the project					
Describes how the specs of the system were tested and validated					
Presents the organization of the team and any adjustments needed					
during the project					
Describes and justifies changes in schedule					
Describes contingency measures for changes in schedule					
Market Overview	#DIV/0!	5%			
Presents system users both current and potential					
Identifies competitors and how the system compares with					
competition					
Results and Discussion	#DIV/0!	10%			
Presents the technical results of the project					
Presents and analyzes the ethical aspects of the project					

Presents and analyzes the legal aspects of the project			
Presents and analyzes the environmental impact of the project
