

Marcel Castro

He is a professor of Electrical Engineering at the University of Puerto Rico in the Mayagüez Campus (Recinto Universitario de Mayagüez). His research efforts include academic, educational and service activities. Some of his research areas of interest include appropriate technology, engineering education, power electronics, computational intelligence, electric motor drives, and renewable energy systems. One of his current research projects combine most of his research interests and is based in the concept of appropriate technology. The project title is "Graduate Research and Education for Appropriate Technology: Inspiring Direct Engagement and Agency (GREAT IDEA)". You can find more information in the following website: <http://greatidea.uprm.edu/>.
