The objective of this assignment is to ensure that you have thoroughly learned Chapter 16. For this assignment, you are required to provide answers to the following 6 questions chosen from the Sebesta’s textbook (6th edition).

- From Chapter 16’s Problem Set (Pages 650): Questions 5, 6, 7.
- From Chapter 16’s Programming Exercises (Pages 650): Questions 1, 3, 4.

Note 1: you can extract answers of some questions from the slides; however, for some other questions, you may need to explore the textbook or other resources, e.g. Internet.

Note 2: It is extremely important that you write the answers IN YOUR OWN WORDS. Answers that are very similar to those of another student or other resources are not accepted.

Note 3 (Marking scheme). This assignment has 100 marks and for every question that you do not provide the answer or the provided answer is incorrect you will lose 25 marks. This means—for instance—if you provide correct answers for 2 of the questions and leave the remaining 4 questions blank (or incorrect answers), you will get nothing!

Note 4: Make a copy of your answers for your own reference, as assignments will not be returned to you.

Deadline: Thursday, August 12 by email.

Send me your assignments as a PDF attachment by email not later than 9:00 PM.

Email Subject: ICOM4036, A25
Email Body: empty

**** Note the deadlines (dates and times) are firm. Please plan ahead. ****
